AQUA-FIT
FOR PIPES AND FITTINGS

We are Aquafit.

We manufacture and supply quality uPVC pipe and fittings. But we're much more than that.

We started from the ground up. Three brothers - all qualified tradesmen - with a dream to remove the distance between manufacturers and the trade.

From our years on the tools, we've experienced first-hand the frustration and expense of dealing with product quality issue, plumbing supply and delivery delays.

That's why we started Aquafit and why we place tradies at the heart of what we do.

Making it beyond easy for you to get the quality PVC pipe and fittings you need when you need them.

As New Zealand's only independent manufacturer of PVC pipe solutions, we make it, source it, stock it, and deliver it. That way nothing is left to chance.

That means you'll get the pipes and fittings you need, when you need them for your plumbing, drainage or construction projects.

Giving you the best availability, trusted quality and the right price is more than a promise.

At Aquafit, it's a certainty.

About this Catalogue.

This Core Product Catalogue is only showcasing our core products. We do hold other products in stock for your convenience and are happy to help source other product from our fellow manufacturers.

Phone our customer service team on 0508 278 234, We would love to help.

Our ECOPLAS Product

ECOPLAS is a trusted brand of uPVC pipes and fittings designed, manufactured and sourced by tradesmen for tradesmen.

We manufacture in New Zealand and Australia and source from our excellent global partners to provide the highest quality product at a competitive price.

Traceable Quality

You can have certainty in ECOPLAS products with all products traceable from raw material to finished product, including production audits, random batch testing, WaterMark Licencing, Best Environmental Practice certification and last but not least our own famous 'tough tradesman' test.

The Preferred Choice for Tradespeople

Tradespeople across New Zealand and Australia choose ECOPLAS for:

- 1 Consistent Quality
- 2 Solid Wall Construction
- 3 BEP Certification
- 4 Watermark Licencing
- 5 Value for Money

DWV Systems.

Drain, Waste and Vent systems are the building blocks of plumbing. And when it comes to getting the basics right, we've got you covered.

AQUA FIT
FOR PIPES AND FITTINGS

We carry a full range of uPVC pipes and fittings from 32 to 300mm diameter for residential, commercial and industrial projects. And, because we're DWV specialists, we always carry high stock units so you can get straight on with the job - no hold ups.

DWV quick facts as per AS/NZS 1260.

- Pipes of nominal diameter up to and including 80mm have no pipe stiffness requirement - they're specified solely on materials and dimensions.
- Pipes 100mm+ are specified by minimum stiffness.
- Class SN4 & SN6 are suitable for plumbing and domestic use - unless otherwise specified, these will be supplied.
- Classes SN8, SN10 & SN16 are available on request.

Do you have any questions about Aquafit products or the related AS/NZS 1260 standards?

Give us a call on **0508 AQUAFIT**

Sizing chart tip.

Sometimes there's confusion around actual pipe diameters compared to their 'so-called' size. So we've laid out all the specs side by side, so you can see exactly what you're getting...

PLAIN WALL PIPE DIMENSIONS AS/NZS 1260

KEEP VERMIN OUT

**We dig deep and draw
on our knowledge of
the trade to give you
the right solutions for
your business.**

**Getting you what you
need, when and where
you need it, doesn't
happen by chance.**

**At Aquafit, it's a
certainty!**

Non-Return Valves.

Our Non-Return Valve is a simple and effective way to eliminate flood risk from backflow through drainage channels.

Features:

- Rigid uPVC injection molded body
- M&F fitting (rubber ring socket inlet, spigot outlet)
- Handel to allow valve to locked in open or close position
- Opening top inspection cover
- Removable parts for servicing

INSPECTION CHAMBER

Internal profile specially designed to provide uninterrupted flow (no reduced crossed flow section). Full access for pipe cleaning or rodding.

PLASTIC FLAP

Rigid uPVC injection moulded. Completely removable for servicing.

FLAP GASKET

Twin-lip profile to ensure optimal water tightness.

INTERNAL SHAPE

Built-in waterfall. No reduced crossed flow section.

NORMAL WORKING SITUATION

EFFECTIVE ANTI-FLOODING

NON-RETURN VALVES (100mm, 150mm)

Stormwater Systems.

From commercial grade downpipes to streamlined home drainage systems, we've designed a tough and practical range for collecting and directing excess water where you need it to go.

AQUA FIT
FOR PIPES AND FITTINGS

Check out our large bore stormwater systems – a popular choice for commercial downpipe applications, moulded fittings, sweeping tight radiuses, smart colours that match our pipe range and look so good you won't be painting them.

Plus, smart, strong alloy clipping systems to finish it all off (see Holderbat Clips on page 37).

All our stormwater systems are available from 90-300mm diameter and we always carry high stock units so you can get exactly what you need any time.

Do you have any questions about Aquafit products or the related AS/NZS 1254 standards?

Give us a call on 0508 AQUAFIT

Quick tip.

For 100mm stormwater fittings, just use 100mm DWV fittings (from page 11).

It'll give you a wider range, better quality and better value. Though if you must have stormwater fittings, just talk to us 0508 AQUAFIT.

We carry a full range of uPVC pipes and fittings from 32 to 300mm diameter for residential, commercial and industrial projects. And, because we're DWV specialists, we always carry high stock units so you can get straight on with the job – no hold ups.

Sizing chart tip.

This sizing chart from AS/NZS 1254 lays out all the pipe sizes side by side so there's no confusion.

Quick Couplers.

Gone are the days of rubber sleeves and wire ties... Quick Couplers make tough jobs like pipe repairs or joining earthenware to PVC pipes an ultra simple task. Quick couplers are a quick and very effective fix saving you time, materials and money. We stock Quick Couplers for pipes from 32-375mm in diameter.

Quick coupler ID sizing chart.
