

# Flexitec.

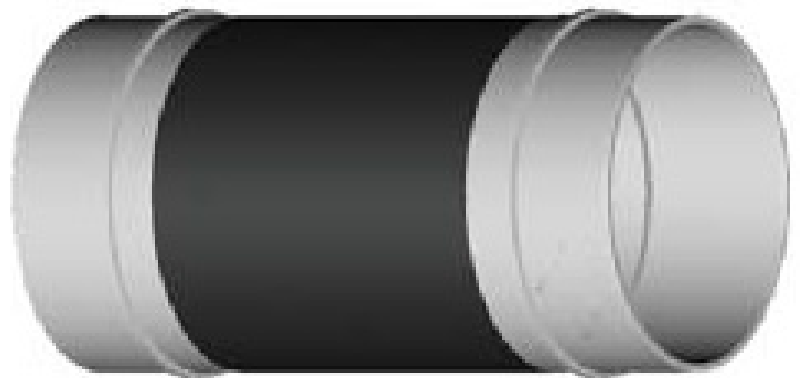

The Most Flexible Joint in the Civil Market.

Acting like a shock absorber, Flexitec takes the stress out of fixed and rigid installation.

Flexitec is an ideal solution for reactive soil sites and has unlimited potential for use in almost any residential, commercial or civil application where plumbing flexibility is key.

Flexitec is able to accommodate a huge variety of movement in a multitude of directions:

- Angular Deflection (side to side movement)
- Expansion and Contraction
- Twist and Torque Capability

# Flexitec.

## The Most Flexible Joint in the Civil Market.

The unique Flexitec joint is made from an ABS skeletal frame and an elastomeric (rubber like) sheath which have been injection moulded together, creating a fitting of superior strength and flexibility.

Flexitec fittings have:

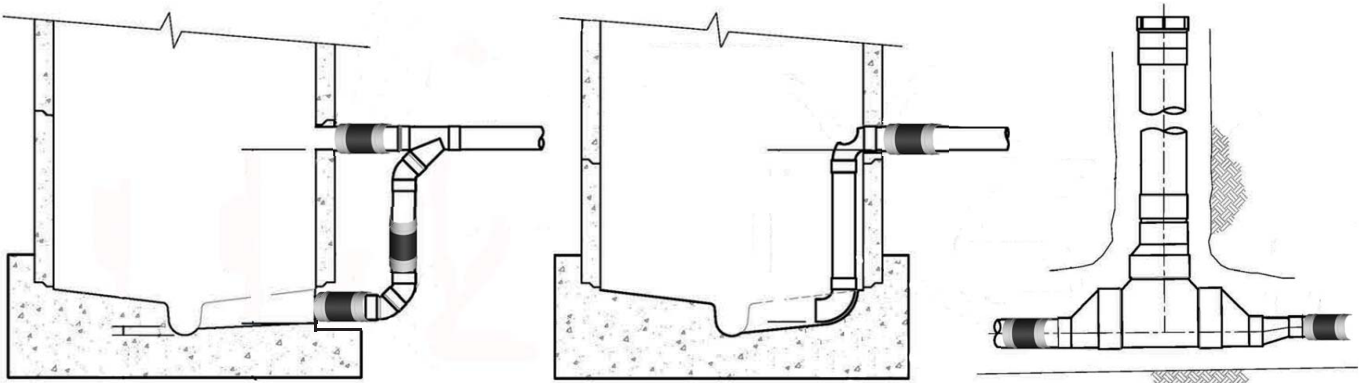

- Superior resistance to UV aging and general weathering
- The ability to be used in temperatures ranging from -50C to 120C
- Superior fatigue resistance
- Excellent resistance to acids, chemicals detergents and cleaners, H2S gas; and
- The ability to return back to shape after use in a wide range of temperatures.

## Flexitec, The Range:

SIZE (mm)	INLET	OUTLET
100mm	Socket	Socket
150mm	Socket	Socket
225mm	Socket	Socket

## Recommended Flexitec Installations:
